# FCCLA Planning Process

## Interior Design

### Level 2

---

#### IDENTIFY CONCERNS

We are concerned that we haven't had the opportunity to incorporate all of the STEM (Science, Technology, Engineering, and Mathematics) skills we have acquired through our higher-level mathematics courses, science courses and also our Family and Consumer Sciences courses.

---

#### SET A GOAL

Our goal is to transfer the learning we have obtained from all of our core classes and Family and Consumer Sciences classes into the Interior Design STAR Event. We will use the resources available, research the "client's" needs along with planning and creating our STAR Event during the months of September 2021 through January of 2022. We will have our presentation completed prior to our FCCLA Mid-Winter STAR Event Competition January 2022. We will know we have met our goal when our presentation is ready for the January 2022 date.

---

#### FORM A PLAN (WHO, WHAT, WHEN, WHERE, HOW, COST, RESOURCES, AND EVALUATION)

**Who:** Emily Drewicke and Jordyn Perry

**What:** Research, plan, create, and present our Interior Design STAR Event

**When:** During the months of September 2021 through January 2022

**Where:** Herman-Norcross High School Family and Consumer Sciences Classroom

**How:** We will use the FCCLA 2021-2022 Design Scenario found in the FCCLA STAR Event Handbook to research, plan, and create our project in preparation for presentation.

**Cost:** The cost of this project will be minimal. We will need to purchase display boards and also search for samples for our display board.

**Resources:** FCCLA Competitive Events Guidebook, NJBA Planning Guide, Homes and Interiors, the Internet, Homestyler program free online.

**Evaluation:** We will know we have met our goal when we have completed our STAR Events preparations prior to our Mid-Winter due date of January 2022.

---

#### ACT

We worked diligently on our Interior Design STAR Event and feel strongly we have met our goal. We have completed our Midwinter STAR Event paperwork and we have also presented our complete STAR Event to our Interior Design Class.

---

#### FOLLOW UP

We feel strongly that we have covered our concern and met our goal. We have successfully integrated the STEM skills we have acquired through many core classes into a "real life" application of those skills. We have learned a great deal about the career of interior design. If we were to do this project at a different time, we would have created a business like model for team meetings and the distribution of the work required to accomplish this STAR Event. We would like to thank our Advisor for encouraging us along the way, and also our parents for their continued support.
